

## Praise for staff at Wellington House

I WENT to the residents/relatives Christmas party at Wellington House on Tuesday, December 16.

After enjoying the celebrations I came out and walked with one of a resident's husband to our respective cars. While walking he told me his wife had only recently become a resident.

After looking after her for some years, he was told his wife needed professional care in a home.

He had kept a letter he had cut from your newspaper referring to Wellington House care and treatment of residents and relatives and took the decision to send her there. He said his wife, family and mainly himself had never regretted it.

When I told him I had written the letter, he shook my hand and thanked me for the information.

I must say his comments made it the best Christmas present I could have expected.

I again thank Wellington House management and staff for all they do and your goodselves for publishing the letter.

Thank you again and have a good Christmas.
